Date: May 1, 1995

Dear Bill and Preston,

I asked the Supervisors Office this morning if your two outstanding bills had been paid. They indicated that they had, but only in the base amounts. The fees for the reissuing the bill for overdue payment was not included. You will need to also pay the fee portion of both billings for me to consider the 1994 permit charges matter closed and to start again in 1995 in the Lynn Springs quarry on the basis of the special use permit. It is too late this year to complete the environmental process for a May or June start this year at Lynn Springs. We still have many problems to work out with the Plan of Operation submitted. These same problems also need to be worked on with this years operation plan for the special use. Here is a list of the problems that we need to work on right a way: 1- Opening new quarry and processing areas without advance permission. 2- Area clean up, camp and quarry area need to have trash (oil cans,soda cans etc) cleaned up and kept clean. 3- The old lower camp needs to have the trash picked up. 4- At our last discussion I thought you wanted to keep the quarry under 5 acres. It is now over that. What is your intention? 5- Need to discuss the camp facilities. What you need and where you need it. Need to consider outhouse facilities. 6- Need to know the estimated amount of material to be removed in 1995. 7- Road maintenance has to be improved, this does include provisions for road drainage. We need to set a schedule for road maintenance and keep it. 8- With the size of operations I now see you getting into we need to determine a bond amount and have you post that amount. 9- Clean up and disposal of pushed juniper trees. This needs to be done this year. 10-The fence between the BLM and the Forest Service that was removed last year needs to be replaced before cattle are moved on to the range. This is not a complete list of items we need to work on, just the most important right now. Please do not start working at Lynn Springs until we have as least discussed and come to some agreement about the ten items above.

I would like to complete the environmental process and documentation on the Lynn Springs by this fall. We can then use it as a guide for updating the Dove Creek quarry operations. That operation is also in need of a reexamination and and up dated Plan of Operations. I will advise you now that a bond will be required for the Dove Creek operation.
